Subject index

A

Acrylic resin models, prosthetic, patient education with (Schabel), 104

Adherents, denture, retention of, method for measuring, in vivo study (Swartz, Norman, and Phillips), 456

Alveolar ridge resorption following tooth extraction (Pietrokovski and Massler), 21

Amalgam cavity design, Class II, clinical evaluation of interproximal retention grooves in (Terkla and Mahler), 596

American Academy of Implant Dentistry, THE JOURNAL OF PROSTHETIC DENTISTRY becomes the official publication for (Jermyn), 422

Anatomic teeth and zero degree teeth, comparison on complete dentures (Brewer, Reibel, and Nassif), 28

Anthropometric parameters of tooth selection (Kern), 431

Aqueous acrylamide gel duplicating material (Dootz, Craig, and Peyton), 570

Articulation, mandibular, and temporomandibular joint, need for changes in concepts relating to (Vaughan), 406

and occlusion, dental (Dyer), 238

Auricle, ear, surgical reconstruction of, frame for (Santiago), 490

B

Beryllium-copper molds, construction of individualized plastic teeth from (Barsoum and El-Ebrashi), 251

Book reviews, 204, 308, 425, 518

Buoyant stress equalizer, improved (Kane and Thompson), 365

Bone obstacles to successful lower dentures and their surgical elimination (Straith), 333

C

Casting procedure, chrome-cobalt partial denture, simplification of (Dootz, Craig, and Peyton), 464

Castings, pin-retained, retentive factors in (Lorey, Embrell, and Myers), 271

Chrome-cobalt partial denture casting procedure, simplification of (Dootz, Craig, and Peyton), 464

Clinical evaluation of interproximal retention grooves in Class II amalgam cavity design (Terkla and Mahler), 596

Cobalt-chrome partial denture casting procedure, simplification of (Dootz, Craig, and Peyton), 464

Coloring materials for denture-base resins, suitability for use (Strain), 54

somatoprostheses (Tashma), 303

Condyles in temporomandibular joint, physiology of terminal rotational position (Trapozzano and Lazzari), 122

Copper-beryllium molds, construction of individualized plastic teeth from (Barsoum and El-Ebrashi), 251

Cordless tissue retraction for impressions for fixed prosthesis (LaForgia), 379

Crown(s) fabrication, porcelain jacket, nonmetal die for (Cowger and Dunkin), 578

January, pp. 1-100; February, pp. 101-206; March, pp. 207-318; April, pp. 319-428; May, pp. 429–528; June, pp. 529–638.

Crown(s)—Cont'd
marginal depth, effect upon gingival tissue (Marcum), 479
two-dimensional photoelastic stress analysis of (Craig et al.), 292

D

Deglutition, determination of maxillomandibular force generated during (Finnegan), 134
Dental articulation and occlusion (Dyer), 238
restorations, defective prevalence of (Moore and Stewart), 372
experimental stress analysis of (Craig et al.), 277, 292
Denture(s) adherents, retention of, method for measuring, in vivo study (Swartz, Norman, and Phillips), 456
base pressure tests (Berg, Chase, and Ray), 540
resins, coloring materials for, suitability for use (Strain), 54
complete and partial, stress regulator for (Plotnick), 166
appreciation of, patient factors in (Carlsson, Otterland, and Wennström), 322
comparison of zero degree teeth and anatomic teeth on (Brewer, Reibel, and Nassif), 28
partial dentures, and natural teeth, physiology of occlusal coordination of (Skinner), 559
vertical dimension of occlusion for, roentgenographic method to determine (Douglas and Maritato), 450
fixed partial, construction, method for pontic stabilization in (Ruhlman and Richter), 401
tooth and tissue supported (Shelby), 590
low tolerance to, supplemental report (Sharp), 222
lower, successful, bone obstacles to, and their surgical elimination (Straith), 333
mandibular, stability and retention of (Faber), 210
mold separators as cause of staining around porcelain denture teeth (Wood, Sorensen, and Ortman), 149
Denture(s)—Cont'd
organic or metal bases for (Moore), 227
partial, acquiring space for (McGill), 163
chrome-cobalt casting procedure, simplification of (Dootz, Craig, and Peyton), 464
natural teeth, and complete dentures, physiology of occlusal coordination of (Skinner), 559
overlay and pin, experimental (Knodle), 472
patients, immediate, follow-up treatment for (Kelly), 16
whistle and swish sound in (Silverman), 144
removable partial, design and force distribution with: progress report (Henderson and Seward), 350
design: review and challenge (Potter, Appleby, and Adams), 63
difficulties in evaluating (Baker), 60
esthetic attachments for (Breisach), 261
occlusal requirements for (Colman), 155
precision-attached, improvements (Singer), 69
treatment, motivation as factor in (Collett), 5
Design and force distribution with removable partial dentures: progress report (Henderson and Seward), 350
of removable partial dentures, review and challenge (Potter, Appleby, and Adams), 63
Die, nonmetal, for porcelain jacket crown fabrication (Cowger and Dunkin), 578
Difficult denture birds (Koper), 532
Disproportion, maxillomandibular, removable appliance for correction of (Berke and Moleres), 172
Distance, interocclusal, means for measuring (Larkin), 247
Duplicating material, aqueous acrylamide gel (Dootz, Craig, and Peyton), 570

E

Ear(s), auricle, surgical reconstruction of, frame for (Santiago), 490
prosthetic, case report (Santiago), 418

Edentulous patient, temporary prosthesis for following maxillary resection (Ampil, Ellinger, and Rahn), 88

Editorial by Chairman of Editorial Council (Block), 4

Electromyographic study of occlusal interferences and mastication (Schaerer, Stallard, and Zander), 438

Electrosurgical preparation of gingival marginal tissue for fixed prosthodontics (Fellman), 583

Esthetic attachments for removable partial dentures (Breisach), 261

Extraction, tooth, alveolar ridge resorption following (Pietrokovski and Massler), 21

F

Facial types, occlusal plane in relation to (Hartono), 549

Ferrier design, mechanical separators (Stibbs), 603

Force distribution and design with removable partial dentures: progress report (Henderson and Seward), 350

G

Gel, aqueous acrylamide, duplicating material (Dootz, Craig, and Peyton), 570

Gingival marginal tissue, electrosurgical preparation of, for fixed prosthodontics (Fellman), 583

tissue, effect of crown marginal depth upon (Marcum), 479

Graft, skin, combined with ridge extension technique (Prowler), 343

H

Hyperplasia of palate, inflammatory papillary (Fairchild), 232

I

Implants, mandibular unilateral subperiosteal, re-evaluation and 12 year report (Linkow), 509

Inlays, two-dimensional photoelastic stress analysis of (Craig et al.), 277

Interocclusal distance, means for measuring (Larkin), 247

Interproximal retention grooves in Class II amalgam cavity design, clinical evaluation of (Terkla and Mahler), 596

J

Jaw movements, photoelectric mandibulography as technique for studying (Gillings), 109

Joint, temporomandibular, and mandibular articulation, need for changes in concepts relating to (Vaughan), 406

or myofacial pain, occlusal discrepancies that cause diagnosis of (Block), 488

JOURNAL OF PROSTHETIC DENTISTRY, THE, becomes official publication for The American Academy of Implant Dentistry (Jermyn), 422

L

Laser radiation: some specific dental effects and evaluation of its potential in dentistry (Peck and Peck), 195

M

Mandible, partial resection of, prosthetic management after, case report (Santiago), 266

rest position (Murphy), 329

Mandibular arch width, decreased, in opening movements (Regli and Kelly), 49

articulation, and temporomandibular joint, need for changes in concepts relating to (Vaughan), 406

dentures, stability and retention of (Faber), 210

movements, means for studying (Messerman), 36

discussion (Rosenblatt), 44

unilateral subperiosteal implants, re-evaluation and 12 year report (Linkow), 509

Mandibulography, photoelectric: technique for studying jaw movements (Gillings), 109

Marginal depth, crown, effect upon gingival tissue (Marcum), 479
Mastication and occlusal interferences, electromyographic study (Schaerer, Stallard, and Zander), 438
Maxillary resection, temporary prosthesis for edentulous patient following (Ampil, Ellinger, and Rahn), 88
Maxillectomy, presurgical prosthesis (Lang and Bruce), 613
Maxillofacial patients, prosthetic treatment of (Bruno), 497
Maxillomandibular disproportion, removable appliance for correction of (Berke and Moleres), 172
force generated during deglutition, determination (Finnegan), 134
Mechanical separators, Ferrier design (Stibbs), 603
Metal or organic bases for dentures (Moore), 227
Modification of palatal lift speech aid (Lang), 620
Motivation: factor in denture treatment (Collett), 5
Myofacial or temporomandibular joint pain, occlusal discrepancies that cause, diagnosis of (Block), 488

N

News and notes, 93, 205, 310, 427, 520, 627
Nonmetal die for porcelain jacket crown fabrication (Cowger and Dunkin), 578

O

Occlusal coordination, physiology of, of natural teeth, complete dentures, and partial dentures (Skinner), 559
discrepancies that cause temporomandibular joint or myofacial pain, diagnosis of (Block), 488
interferences and mastication, electromyographic study (Schaerer, Stallard, and Zander), 438
plane in relation to facial types (Hartono), 549
reactive prosthodontics (Baker), 566
rehabilitation, examination, diagnosis, and treatment planning in (Mann), 73
Occlusal—Cont'd
requirements for removable partial dentures (Colman), 155
Occlusion and articulation, dental (Dyer), 238
vertical dimension of, roentgenographic method to determine, for complete dentures (Douglas and Maritato), 450
Opening movements, phenomenon of decreased mandibular arch width in (Regli and Kelly), 49
Organic or metal bases for dentures (Moore), 227
Overlay and pin partial denture, experimental (Knodle), 472

P

Pain, temporomandibular joint or myofacial, occlusal discrepancies that cause, diagnosis of (Block), 488
Palatal lift speech aid, modification of (Lang), 620
Palate, inflammatory papillary hyperplasia of (Fairchild), 232
Papillary hyperplasia, inflammatory, of palate (Fairchild), 232
Parallel pin restorations, retentive properties of (Moffa and Phillips), 387
Patient education with prosthetic acrylic resin models (Schabel), 104
factors in appreciation of complete dentures (Carlsson, Otterland, and Wennström), 322
Photoelastic stress analysis, two-dimensional, of crowns (Craig et al.), 292
of inlays (Craig et al.), 277
Photoelectric mandibulography: technique for studying jaw movements (Gillings), 109
Physiology of occlusal coordination of natural teeth, complete dentures, and partial dentures (Skinner), 559
Pin and overlay partial denture, experimental (Knodle), 472
-retained castings, retentive factors in (Lorey, Embrell, and Myers), 271
Plane, occlusal, in relation to facial types (Hartono), 549

Plastic teeth, individualized, construction from beryllium-copper molds (Barsoum and El-Ebrashi), 251
Pontic stabilization in fixed partial denture construction, method for (Ruhlman and Richter), 401
Porcelain denture teeth, staining around, denture mold separators as cause of (Wood, Sorensen, and Ortman), 149
-fused-to-metal prostheses, new design for (Weinberg), 178
jacket crown fabrication, nonmetal die for (Cowger and Dunkin), 578
rehabilitation, problems in (Bronstein), 79
Presurgical maxillectomy prosthesis (Lang and Bruce), 613
Prosthesis (es), fixed, impressions for, cordless tissue retraction for (LaForgia), 379
porcelain-fused-to-metal, new design for (Weinberg), 178
temporary, for edentulous patient following maxillary resection (Ampil, Ellinger, and Rahn), 88
Prosthetic ears, case report (Santiago), 418
Prosthodontics, fixed, electrosurgical preparation of gingival marginal tissue for (Fellman), 583
occlusal reactive (Baker), 566

R

Radiation, laser: some specific dental effects and evaluation of its potential in dentistry (Peck and Peck), 195
Readers' round table, 92, 306, 424, 515
Rehabilitation, occlusal, examination, diagnosis, and treatment planning in (Mann), 73
porcelain, problems in (Bronstein), 79
Resection, partial, of mandible, prosthetic management after, case report (Santiago), 266
Resins, denture-base, coloring materials for, suitability for use (Strain), 54
Resorption of alveolar ridge following tooth extraction (Pietrokovski and Massler), 21
Restorations, dental, defective, prevalence of (Moore and Stewart), 372
parallel pin, retentive properties of (Moffa and Phillips), 387
Rest position of mandible (Murphy), 329
Retention of denture adherents, method for measuring, in vivo study (Swartz, Norman, and Phillips), 456
and stability of mandibular dentures (Faber), 210
Retentive factors in pin-retained castings (Lorey, Embrell, and Myers), 271
properties of parallel pin restorations (Moffa and Phillips), 387
Reverse swallowing (Saladino), 219
Ridge extension technique combined with skin graft (Prowler), 343
Roentgenographic method to determine vertical dimension of occlusion for complete dentures (Douglas and Maritato), 450

S

Separators, denture mold, as cause of staining around porcelain denture teeth (Wood, Sorensen, and Ortman), 149
mechanical, Ferrier, design (Stibbs), 603
Skin graft combined with ridge extension technique (Prowler), 343
Somatoprostheses, coloring (Tashma), 303
Sound, whistle and swish, in denture patients (Silverman), 144
Speech aid, palatal lift, modification of (Lang), 620
Stability and retention of mandibular dentures (Faber), 210
Staining around porcelain denture teeth, denture mold separators as cause of (Wood, Sorensen, and Ortman), 149
Stress analysis, experimental, of dental restorations (Craig et al.), 277, 292
equalizer, buoyant, improved (Kane and Thompson), 365
regulator for complete and partial dentures (Plotnick), 166
Subperiosteal implants, mandibular unilateral, re-evaluation and 12 year report (Linkow), 509
Swallowing, reverse (Saladino), 219
Swish and whistle sound in denture patients (Silverman), 144

T

Teeth, natural, complete dentures, and partial dentures, physiology of occlusal coordination of (Skinner), 559
plastic, individualized, construction from beryllium-copper molds (Barsoum and El-Ebrashi), 251
porcelain denture, staining around, denture mold separators as cause of (Wood, Sorensen, and Ortman), 149
zero degree and anatomic, comparison on complete dentures (Brewer, Reibel, and Nassif), 28
Temporomandibular joint, condyles in, physiology of terminal rotational position (Trapozzano and Lazzari), 122
and mandibular articulation, need for changes in concepts relating to (Vaughan), 406
or myofacial pain, occlusal discrepancies that cause, diagnosis of (Block), 488
Tests, pressure, denture base (Berg, Chase, and Ray), 540
Through the eyes of the editor (Boucher), 1, 101, 207, 319, 429, 529
Tissue retraction, cordless, for impressions for fixed prosthesis (LaForgia), 379
and tooth supported fixed partial dentures (Shelby), 590
Tolerance, low, to dentures, supplemental report (Sharp), 222
Tooth selection, anthropometric parameters of (Kern), 431
and tissue supported fixed partial dentures (Shelby), 590

W

Whistle and swish sound in denture patients (Silverman), 144

Z

Zero degree teeth and anatomic teeth, comparison on complete dentures (Brewer, Reibel, and Nassif), 28

Subject index

A

Acrylic denture base resins, reactions associated with (Strain), 465

Acrylic resin, autopolymerizing, processed in water under air pressure, complete denture relines with (Smith, Lord, and Bolender), 103

teeth, an aid in fixed partial denture construction (Larato), 346

Adhesives, denture, clinical evaluation of (Kapur), 550

American Academy of Restorative Dentistry, report of the Committee on Scientific Investigation (Rhoads), 376

Board of Prosthodontics (Beck), 589

Articulator, new, for use in teaching and general dentistry, Hickey, Lundeen, and Bohannan), 425

Artificial teeth, selection of (Wehner, Hickey, and Boucher), 222

B

Bond strength and mechanical properties of dental porcelain enamels (Leone and Fairhurst), 155

C

Cadmium patterns, porcelain-veneered full-crown restorations made with (Ewing and Bentman), 140

Canadian Academy of Prosthodontics, history of (Wood), 187

Canine function theory and the periodontium (Alexander), 571

Carbide burs, tungsten, and diamond points at ultra-high rotational speeds, cutting effectiveness of (Schuchard and Watkins), 58

Castings made directly to refractory dies (Lund and Shryock), 251

Castings, multiple unit, clinical applications of for fixed prostheses (Bruce), 359

Centric jaw-relationship records, effect of temporary bases on (Schoen and Stewart), 211

Centric occlusion to maximum intercuspation, study of mandibular movement from (Hodge and Mahan), 19

Check record, considerations of in complete denture construction (Preiskel), 98

Committee on Scientific Investigation of The American Academy of Restorative Dentistry, report of (Rhoads), 376

Complete denture patients, surgical expeiences of (Jones and Nakayama), 12

Condyle, posterior displacement of and unilateral reduction in the vertical dimension of occlusion (Harris), 66

Contourator study, do-it-yourself denture reline materials (Terry, Lutes, and Ellinger), 31

Crown(s), a porcelain-faced (Baker), 353

and extensive inlays, reproducing occlusal anatomy for (Benfield et al.), 326

preparation, and internal resorption (Dilts and Luebke), 126

Cutting effectiveness of tungsten carbide burs and diamond points at ultra-high rotational speeds (Schuchard and Watkins), 58

D

Dental units, assembly of by soldering (Stackhouse), 131

Dentist and otolaryngologist, role of in evaluating temporomandibular joint syndrome (Gelb et al.), 497

Denture(s) adhesives, clinical evaluation of (Kapur), 550

base resins, acrylic, reactions associated with (Strain), 465

complete upper, physical factors in retention of (Tyson), 90

construction, complete, considerations of the check record in (Preiskel), 98

etiology of mucosal inflammation associated with (Love, Goska, and Mixson), 515

fixed partial, porcelain fused to gold (Medwedeff), 46

impressions, complete, accurate, premedication as an aid in obtaining (Rudd and Morrow), 86

reline materials, do-it-yourself, Contourator study (Terry, Lutes, and Ellinger), 31

relines, complete, with autopolymerizing acrylic resin processed in water under air pressure (Smith, Lord, and Bolender), 103

Diagnosis, oral, improved, three-dimensional roentgenograms for (Loetz), 177

Diamond points and tungsten carbide burs, cutting effectiveness at ultra-high speeds (Schuchard and Watkins), 58

Disabled patients, severely, auxiliary devices for (Treacher and Watson), 583

Distal-extension-removable partial denture, conversion from a tooth-supported denture (Breitbart), 233

Do-it-yourself denture reline materials, Contourator study (Terry, Lutes, and Ellinger), 31

E

Edentulous ridge, cytologic study of the effect of toothbrush physiotherapy on the mucosa of (Markov), 122

Elderly, crown and bridge prosthodontics for (Elfenbaum), 337

Enamels, porcelain, dental, bond strength and mechanical properties of (Leone and Fairhurst), 155

Epinephrine, absorption of during tissue retraction (Pogue and Harrison), 242

F

Facial silicate cement restorations, a technique for placing (Appel), 257

Facing technique, reverse-pin porcelain, simplified (Silverglate), 54

Fixed prostheses, clinical applications of multiple unit castings for (Bruce), 359

Fluorescence in prosthodontics, uses of (Rudd et al.), 543

Full-crown restorations, porcelain-veneered, made with cadmium patterns (Ewing and Bentman), 140

G

Gingival protection, and compatible temporary tooth health (Hirshberg), 151

Gnathosonics, clinical, stereostethoscope as an instrument for (Watt and Hedegard), 458

Gold, porcelain fused to, fixed partial dentures (Medwedeff), 46
Graphic records of mandibular movements, understanding (LePera), 417

H

Human dentition, margins of safety for forces on (Beke), 261
Hyperplasia, palatal papillary (Lambson and Anderson), 528

I

Impression procedure for construction of maxillary immediate dentures (Lutes, Ellinger, and Terry), 202
technique for teeth prepared for parallel pins (Möllersten), 579
Inflammation, mucosal, associated with dentures, etiology of (Love, Goska, and Mixson), 515
Inlays, extensive, and crowns, reproducing occlusal anatomy for (Benfield et al.), 326
Intercuspation, study of mandibular movement from centric occlusion to (Hodge and Mahan), 19
Interocclusal distance, a technique for constantly monitoring it (Kydd, Harrold, and Smith), 308
Investment in the future (Gehl), 190
foreword to (Boucher), 189

J

Jaws, overclosure of, a clinical syndrome (Kovats), 311
Jaw-relationship records, centric, effect of temporary bases on (Schoen and Stewart), 211

L

Laminagraphs of the temporomandibular joint, standardized sectional (Mazaheri and Biggerstaff), 489
Lips, an analysis of soft tissue contours of, in relation to the maxillary cupids (Lieb, Silverman, and Garfinkel), 292

M

Mandibular movement(s) from centric occlusion to maximum intercuspation, study of (Hodge and Mahan), 19
with changes in the vertical dimension (Goodkind), 438
understanding graphic records of (LePera), 417
Maxillary cuspids, an analysis of soft tissue contours of the lips in relation to (Lieb, Silverman, and Garfinkel), 292
immediate dentures, impression procedure for construction of (Lutes, Ellinger, and Terry), 202
resection and its prosthetic replacement (Zarb), 268
Maxillofacial prosthetics, intraoral, for cancer patients, treatment planning for (Curtis), 70
Mechanical mixing, effects on the physical properties of silicate cements (Mueller, Combe, and Greener), 160
Mucoperiosteum, palatal, stiffness of (Kydd and Mandley), 116
Mucosa of the edentulous ridge, cytologic study of the effect of toothbrush physiotherapy on (Markov), 122
Mucosal inflammation associated with dentures, etiology of (Love, Goska, and Mixson), 515
Muscle exercise, preprosthetic, effects of upon perioral tonus (Jacobs), 217

N

Nevus, white sponge in oral regions (Gardner), 39

O

Occlusal anatomy for crowns and extensive inlays, reproducing (Benfield et al.), 326

Occlusion, centric, to maximum intercuspation, study of mandibular movement from (Hodge and Mahan), 19
vertical dimension and posterior displacement of the condyle, unilateral reduction in (Harris), 66
Otolaryngologist and dentist, role of in evaluating temporomandibular joint syndrome (Gelb et al.), 497
Overclosure of the jaws, a clinical syndrome (Kovats), 311

P

Palatal mucoperiosteum, stiffness of (Kydd and Mandley), 116
papillary hyperplasia (Lambson and Anderson), 528
Palatine rugae, effects of tooth movement on (Peavy and Kendrick), 536
Papillary hyperplasia, palatal (Lambson and Anderson), 528
Parallel pins, impression technique for teeth prepared for (Möllersten), 579
Parallelometer, new intraoral (Parmlid), 469
Partial denture(s) construction, acrylic resin teeth as an aid in (Larato), 346
distal-extension-removable, conversion from a tooth-supported denture (Breitbart), 233
fixed, for periodontally involved teeth (Tamarin), 248
removable, accurate (Rudd and Dunn), 559
Periapical lesions and vital pulps, conservative treatment of teeth with (Moore), 476
Periodontally involved teeth, fixed partial dentures for (Tamarin), 248
Periodontium and the canine function theory (Alexander), 571
Perioral tonus, effects of preprosthetic muscle exercise upon (Jacobs), 217
Physical factors in retention of complete upper dentures (Tyson), 90
Pins, parallel, impression technique for teeth prepared for (Möllersten), 579
Porcelain enamels, dental, bond strength and mechanical properties of (Leone and Fairhurst), 155
facing technique, reverse-pin, simplified (Silverglate), 54
fused to gold, fixed partial dentures (Medwedeff), 46
Porcelain-faced crown, a (Baker), 353
Porcelain-veneered full-crown restorations made with cadmium patterns (Ewing and Bentman), 140
Posterior teeth, relative efficiency of different types (Nasr et al.), 3
Premedication, aid in obtaining accurate complete denture impressions (Rudd and Morrow), 86
Preprosthetic muscle exercise, effects of upon perioral tonus (Jacobs), 217
Prosthetic(s) devices, auxiliary, for severely disabled patients (Treacher and Watson), 583
maxillofacial, intraoral, for cancer patients, treatment planning for (Harris), 70
Prosthodontics, American Board of (Beck), 589
for the elderly, crown and bridge (Elfenbaum), 337
uses of fluorescence in (Rudd et al.), 543
Pulpal response in rat molars to a new restorative material without a liner (Cotton and Leonard), 482
Pumice, disinfection of (Larato), 534

R

Refractory dies, casting made directly to (Lund and Shryock), 251
investments, stability of with thermal analysis (Jones), 234
Reline materials, denture, do-it-yourself, Contourator study (Terry, Lutes, and Ellinger), 31
Removable partial dentures, accurate (Rudd and Dunn), 559
Resin, acrylic, autopolymerizing, processed in water under air pressure, complete denture relines with (Smith, Lord, and Bolender), 103

Resorption, internal, and crown preparation (Dilts and Luebke), 126

Restorations, porcelain-veneered full-crown, made with cadmium patterns (Ewing and Bentman), 140

Restorative material without a liner, pulpal response in rat molars to (Cotton and Leonard), 482

Reverse-pin porcelain facing technique, simplified (Silverglate), 54

Roentgenograms, three-dimensional, for improved oral diagnosis (Loetz), 177

Roentgenographic examination of edentulous patients (Swenson and Hudson), 304

Rugae, palatine, effects of tooth movement on (Peavy and Kendrick), 536

S

Safety for forces on the human dentition, margins of (Beke), 261

Salivary reflex secretion rates, masticatory and gustatory, and taste thresholds of denture wearers (Kapur, Collister, and Fischer), 406

Silicate cement(s), validity of laboratory tests in predicting the clinical behavior of (Mitchem), 168

restorations, facial, a technique for placing (Appel), 257

studies in the effects of mechanical mixing on the physical properties (Mueller, Combe, and Greener), 160

Soldering, assembly of dental units by (Stackhouse), 131

Speeds, ultra-high rotational, cutting effectiveness of tungsten carbide burs and diamond points at (Schuchard and Watkins), 58

Sponge nevus, white, in oral regions (Gardner), 39

Stereostethoscope, an instrument for clinical gnathosonics (Watt and Hedegard), 458

Stiffness of palatal mucoperiosteum (Kydd and Mandley), 116

Suction cup dentures, multiple (Jermyn), 316

Surgical experiences of complete denture patients (Jones and Nakayama), 12

Synovial fluid, composition and examination of (Schmid and Ogata), 449

T

Taste thresholds of denture wearers, and masticatory and gustatory salivary reflex secretion rates (Kapur, Collister, and Fischer), 406

Temporary bases, effect of on accuracy of centric jaw-relationship records (Schoen and Stewart), 211

tooth health, compatible, and gingival protection (Hirshberg), 151

Teeth, artificial, selection of (Wehner, Hickey, and Boucher), 222

Temporomandibular joint, standardized sectional laminagraphs of (Mazaheri and Biggerstaff), 489

dysfunctions, symptoms and management (Shore), 365

syndromes, role of dentist and otolaryngologist in evaluating (Gelb et al.), 497

Thermal analysis and stability of refractory investments (Jones), 234

Three-dimensional roentgenograms for improved oral diagnosis (Loetz), 177

Tissue retraction, absorption of epinephrine during (Pogue and Harrison), 242

Tooth movement, effects of on the palatine rugae (Peavy and Kendrick), 536

Tooth-supported denture, conversion to a distal-extension-removable partial denture (Breitbart), 233

Toothbrush physiotherapy, effect of on mucosa of the edentulous ridge, cytologic study of (Markov), 122

Treatment planning for intraoral maxillofacial prosthetics for cancer patients (Curtis), 70

Tungsten carbide burs and diamond points at ultra-high rotational speeds, cutting effectiveness of (Schuchard and Watkins), 58

V

Vertical dimension, mandibular movement with changes in (Goodkind), 438

Vital pulps and periapical lesions, conservative treatment of teeth with (Moore), 476
